

JESSE J'S CANCER JOURNEY

Jesse battled an aggressive form of brain cancer called Glioblastoma for 2 years. She was able to receive treatments from the University of Iowa Hospitals and Mayo Clinic. She also had two craniotomies to treat her Glioblastoma. The first being at the University of Iowa Hospitals and the second in Arizona.

During the operations, Jesse and her husband stayed at Hope Lodge in Iowa City during her treatment and a good Samaritan offered them a place to stay in Arizona for free while she was undergoing a second craniotomy in Arizona.

Despite receiving modern and naturopathic treatments, Jesse gained her wings and went to heaven on December 17, 2020.
